

Management of Spent Mercury-Containing Lamps (Light Bulbs)

A Notice form Lamp Manufacturers For Louisiana Businesses
and Institutions

Information on disposal requirements and recycling facilities, go to www.deq.state.la.us , or www.lamprecycle.org , or call the Office of Waste Services at the Louisiana Department of Environmental Quality at 225-765-0355.

Fluorescent and HID lamps are a good environmental choice.

Generally they are four to five times more efficient than incandescent bulbs.

They reduce your energy consumption, which in turn saves you money.

Reducing energy use cuts down on power plant emissions of mercury and other emissions that contribute to global climate change, acid rain and smog.
